

Publishing house FCC Public

(est. 1991) is one of the well recognized continuators of the tradition of the Czech professional literature on electrical engineering and publisher of magazines, both in printed and electronic version:

ELEKTRO – monthly on electrical engineering, the direct successor of legendary Electrical Horizon (est. 1910),

SVĚTLO („Light“) – bi-monthly on light and lighting technology.

Other activities:

- publishing of books on current topics (lighting technology, industrial management, electrical engineering, etc.),
- organizing yearly up to ten seminars and conferences on progressive issues: eco-mobility, sustainable energy management, home (building and community infrastructure and facilities, connected living or intellectual property),
- being an important media partner of main industry's trade fairs in Central Europe
- close cooperation with universities, schools, communities and main industry players in the Czech Republic.
