Thomson Reuters Research Data & Services is a high-value assessment and decision support resource.

Built upon the industry's most trusted data — Thomson Reuters Web of Science™ — and interpreted by leading subject-matter experts, we provide high-quality, customized metrics and analytics with expert analysis and reports to help you answer the most unique questions about:

- Pollution • Traffic • Environmental protection • Health • And more

Policy-Advisory Support

Holistic assessments of the impact of policies and programs allow you to use data-driven approaches to test or assess specific research policy frameworks. This objective, quantitative evaluation shows current impact and informs specific long-term recommendations and implementations.

Innovation Management

Our ability to build connections between disparate data sets enables us to demonstrate how each effort is fueling innovation. We identify areas of opportunity for you to accelerate translation of ideas into innovative products and impact.

THOMSON REUTERS™
