

An entertaining world of science at iQLANDIA in Liberec will enchant both the big and small

Hundreds of amazing exhibits in ten uniquely conceived exhibits fill the iQLANDIA science centre in Liberec near the border with Poland and Germany. In addition to clever entertainment, it offers a number of unique experiences: Only iQLANDIA visitors can meet a talking humanoid robot, and the Sex mission exhibit is also conceptually unique and answers questions about sexual life. A 3D planetarium also ranks among the world's best.

"Hello! My name is Thespian!" Who's talking? It's a humanoid robot, the first in the Czech Republic, who, besides Czech, also fluently speaks German, Polish and English, and his conversation is animated with gestures and even a smile. Wearing 3D glasses and lounging in comfortable seats in the planetarium, you can enjoy a starry sky projection and learn interesting facts about the stars that can be seen in this season's night sky. The iQLANDIA 3D planetarium projection technology belongs among the most advanced in the world.

iQLANDIA further offers a number of support programmes, science shows with explosions and scientific experiments and entertaining workshops.

There are sufficient parking spaces for cars and buses in front of the centre, and there is also a restaurant.

iQLANDIA is open also for private events such as birthday parties, weddings and anniversaries.
